

Performance Testing

Data	30.09.2026
Team ID	SWTID-2026-3759
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	5Marks

Step 1: Testing Overview

Field	Details
Testing Tool Used	ServiceNow Platform
Type of Testing	Load Testing, Functional Performance Testing
Target Module / API	Import Set and Transform Map
Test Environment	ServiceNow Development Instance
Test Date	29 September 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Import spreadsheet with sample records	1	30	Data should be imported successfully
2	Transform and map source fields to target fields	1	30	Fields should map correctly
3	Import multiple records	5	60	Records should process without significant delay
4	Validate imported records in target table	1	30	All records should be accurate and complete

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	1.5 seconds	Pass	Good response time
2	Response Time (Max)	< 5 seconds	3 seconds	Pass	Within target
3	Throughput (Req/sec)	—	5 Req/sec	Pass	Data processed successfully
4	Error Rate	< 1%	0%	Pass	No errors observed
5	CPU Utilization	< 80%	45%	Pass	Normal CPU usage
6	Memory Utilization	< 80%	50%	Pass	Normal memory usage

Step 4: Observations & Analysis

Key Findings:

The system successfully imported and transformed spreadsheet data with acceptable response time and no significant errors.

Bottlenecks Identified:

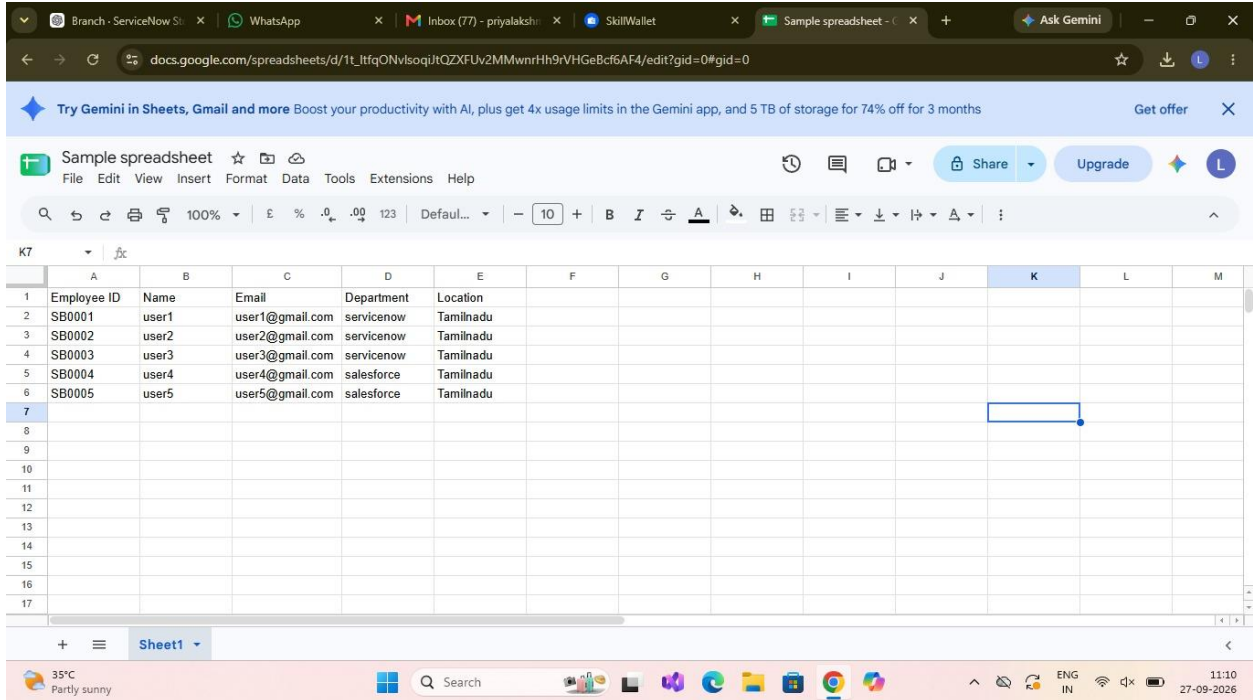

No major performance bottlenecks were identified during testing.

Optimization Steps Taken:

Data mapping and validation were checked to ensure efficient and accurate data processing.

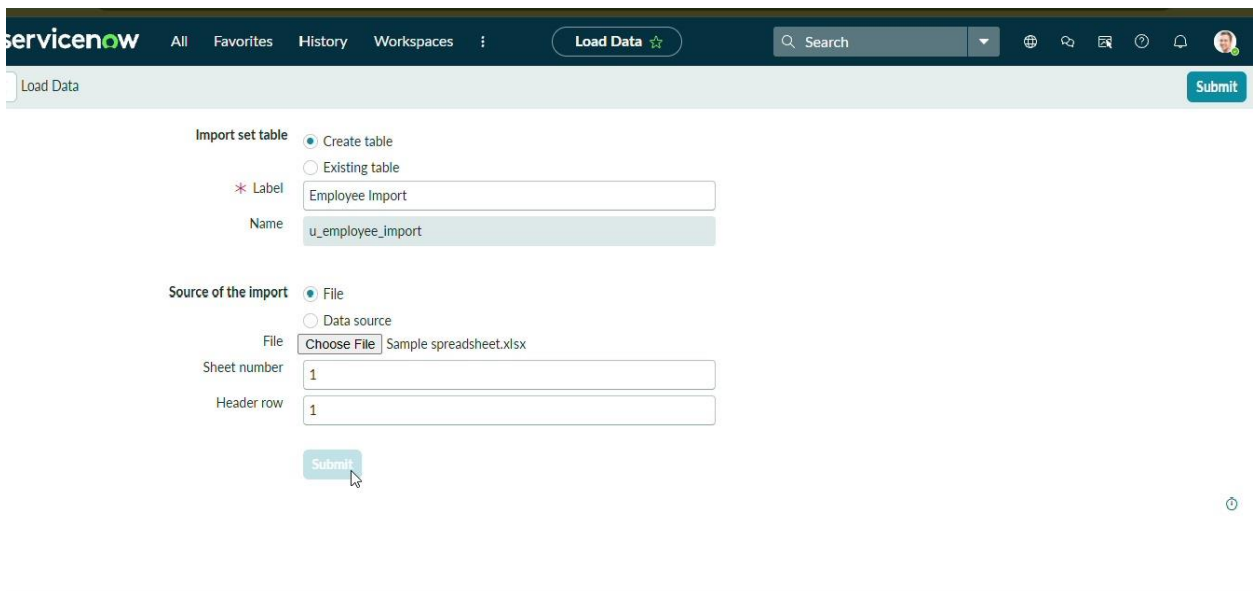

Screenshot

Import Set:

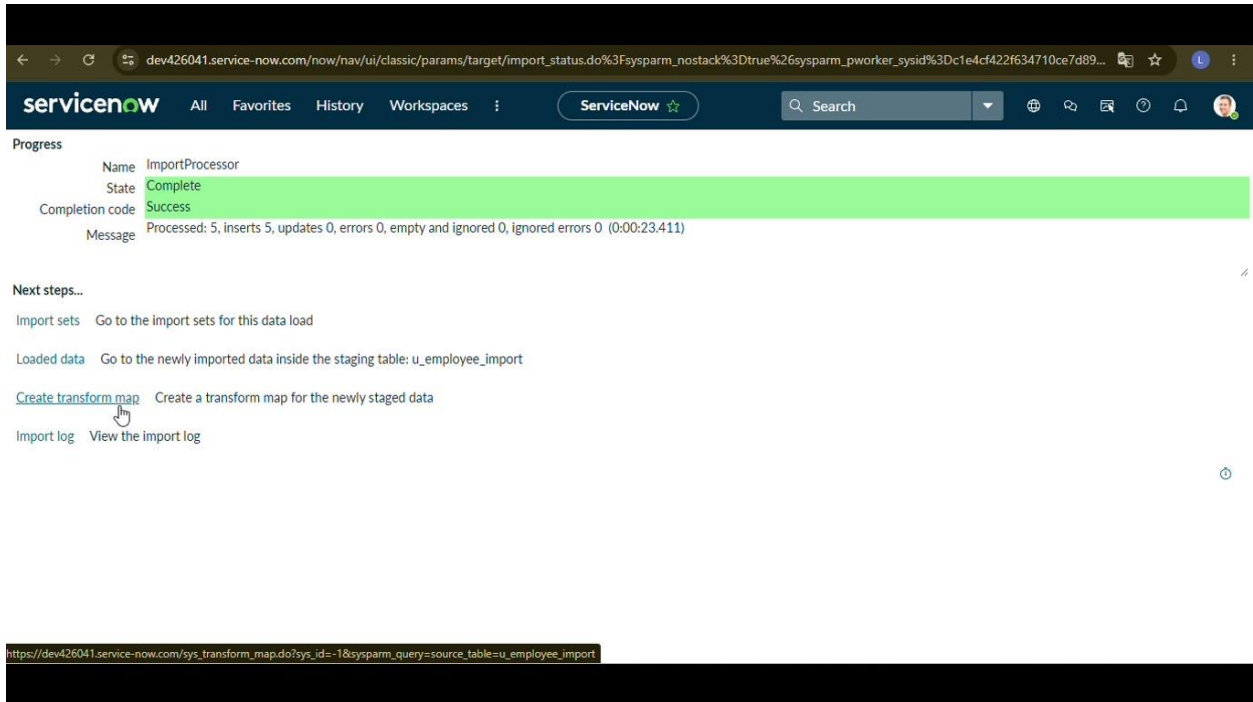

The screenshot shows a Google Sheets interface with a spreadsheet titled 'Sample spreadsheet'. The spreadsheet has columns A through M and rows 1 through 17. The data is as follows:

	A	B	C	D	E	F	G	H	I	J	K	L	M
1	Employee ID	Name	Email	Department	Location								
2	SB0001	user1	user1@gmail.com	servicenow	Tamilnadu								
3	SB0002	user2	user2@gmail.com	servicenow	Tamilnadu								
4	SB0003	user3	user3@gmail.com	servicenow	Tamilnadu								
5	SB0004	user4	user4@gmail.com	salesforce	Tamilnadu								
6	SB0005	user5	user5@gmail.com	salesforce	Tamilnadu								
7													
8													
9													
10													
11													
12													
13													
14													
15													
16													
17													

The screenshot shows the ServiceNow 'Load Data' interface. The 'Import set table' section has two radio buttons: 'Create table' (selected) and 'Existing table'. Below this, there is a 'Label' field with the value 'Employee Import' and a 'Name' field with the value 'u_employee_import'. The 'Source of the import' section has two radio buttons: 'File' (selected) and 'Data source'. Below this, there is a 'File' section with a 'Choose File' button and the text 'Sample spreadsheet.xlsx'. There are also 'Sheet number' and 'Header row' fields, both with the value '1'. A 'Submit' button is at the bottom.

Transform Map:

The screenshot shows the ServiceNow 'ImportProcessor' progress page. The status is 'Complete' with a 'Success' completion code. The message indicates that 5 records were processed (5 inserts, 0 updates, 0 errors, 0 empty and ignored, 0 ignored errors) in 0:00:23.411. Below the progress bar, the 'Next steps...' section provides links for 'Import sets', 'Loaded data', 'Create transform map', and 'Import log'. The 'Create transform map' link is highlighted with a mouse cursor. Below the screenshot, the URL for the transform map is provided: `https://dev426041.service-now.com/sys_transform_map.do?sys_id=-1&sysparm_query=source_table=u_employee_import`.

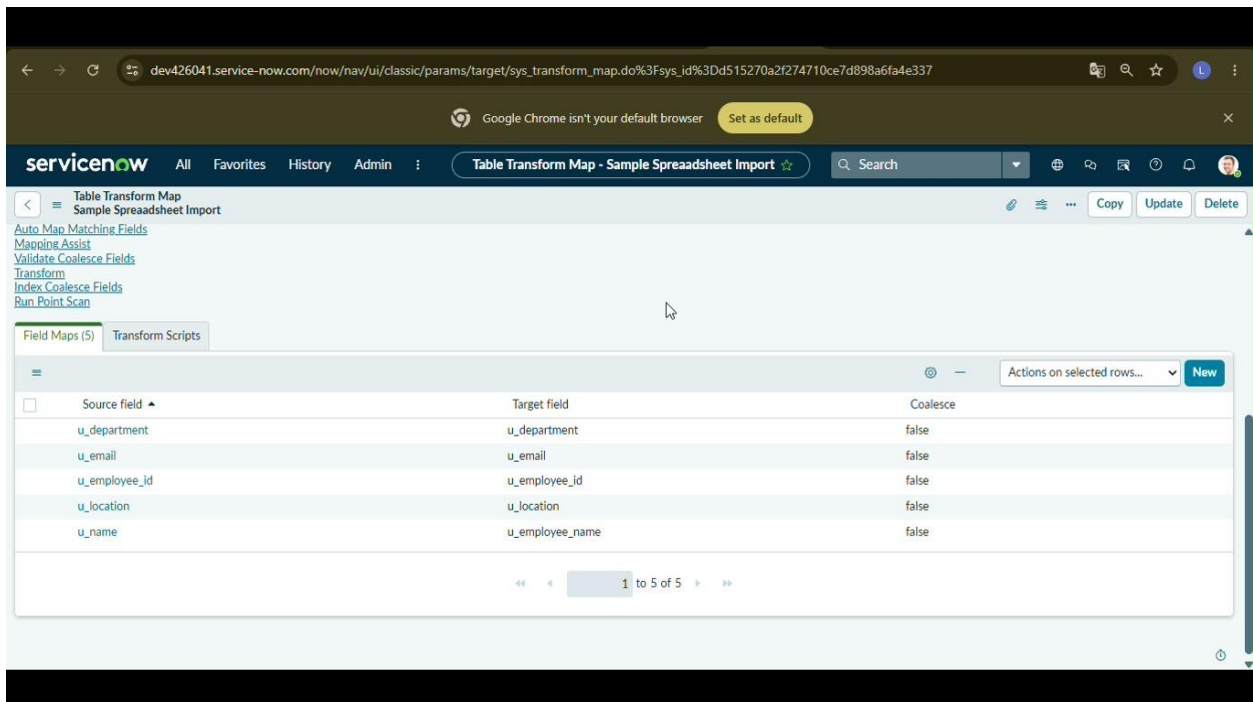

Progress

Name: ImportProcessor
State: Complete
Completion code: Success
Message: Processed: 5, inserts 5, updates 0, errors 0, empty and ignored 0, ignored errors 0 (0:00:23.411)

Next steps...

Import sets: Go to the import sets for this data load
Loaded data: Go to the newly imported data inside the staging table: u_employee_import
[Create transform map](#): Create a transform map for the newly staged data
Import log: View the import log

`https://dev426041.service-now.com/sys_transform_map.do?sys_id=-1&sysparm_query=source_table=u_employee_import`

The screenshot shows the ServiceNow 'Table Transform Map - Sample Spreadsheet Import' configuration page. The 'Field Maps' tab is active, displaying a table with source and target field mappings. The 'Coalesce' column shows 'false' for all mappings. The table includes fields for department, email, employee ID, location, and name. A 'New' button is visible in the top right corner of the table. The page also includes navigation links like 'Auto Map Matching Fields', 'Mapping Assist', 'Validate Coalesce Fields', 'Transform', 'Index Coalesce Fields', and 'Run Point Scan'.

Table Transform Map - Sample Spreadsheet Import

Field Maps (5) Transform Scripts

Source field	Target field	Coalesce
u_department	u_department	false
u_email	u_email	false
u_employee_id	u_employee_id	false
u_location	u_location	false
u_name	u_employee_name	false
