

Import Data using Transform Maps (Spreadsheet)

PHASE 7 – Brainstorming & Ideation

Introduction:

The Skill Wallet project is developed to manage skill-related information in a structured way. It uses Spreadsheet, Import Set, and Transform Map to import and organize data into the target table.

The system helps reduce manual data entry and makes the data import process easier, faster, and more accurate.

Objective

The Brainstorming and Ideation Phase focuses on identifying the project idea and understanding how the Skill Wallet system can be developed using Import Data, Transform Maps, and Spreadsheet data.

Key Activities

- Identify the project concept.
- Understand the purpose of Skill Wallet.
- Identify the need for spreadsheet data import.
- Explore the use of Transform Maps.
- Define the basic project workflow.

Requirement Analysis Phase

Objective

The Requirement Analysis Phase focuses on identifying the functional and technical requirements needed to develop the Skill Wallet project.

Key Activities

- Identify system requirements.
- Identify data requirements.
- Define spreadsheet data fields.
- Identify source and target tables.
- Define Transform Map requirements.
- Identify validation requirements.

Project Design Phase

Objective

The Project Design Phase focuses on designing the structure and workflow of the Skill Wallet data import process.

Key Activities

- Design the data import workflow.
- Design source and target table structure.
- Plan field mapping.
- Design the Transform Map.
- Define the relationship between imported data and target records.

Project Planning Phase

Objective

The Project Planning Phase focuses on organizing the development activities and defining the steps required to complete the project.

Key Activities

- Plan the project activities.
- Divide the project into different phases.
- Plan spreadsheet data preparation.
- Plan Import Set configuration.
- Plan Transform Map configuration.
- Plan testing and validation.
- Plan project documentation.

Project Development Phase

Objective

The Project Development Phase focuses on implementing the Skill Wallet project and configuring the data import process.

Key Activities

- Prepare the spreadsheet data.
- Import the spreadsheet data.
- Create and configure the Import Set.
- Create the Transform Map.
- Configure field mappings.
- Transform the imported data.
- Store the transformed data in the target table.

Project Testing Phase

Objective

The Project Testing Phase focuses on checking whether the imported data is correctly transformed, mapped, validated, and stored in the target table.

Key Activities

- Test spreadsheet data import.
- Check field mapping.
- Verify Transform Map execution.
- Check transformed records.
- Identify and correct errors.
- Validate the final imported data.

Project Demonstration Phase

Objective

The Project Demonstration Phase focuses on presenting the completed Skill Wallet project and explaining the complete data import and transformation process.

Key Activities

- Introduce the project.
- Explain the project objectives.
- Demonstrate spreadsheet data.
- Demonstrate the Import Set process.
- Demonstrate Transform Map configuration.
- Explain field mapping.
- Show the transformed records.
- Present the final project output.
