

Technology Stack

Date	30.09.2026
Team ID	SWTID-2026-3759
Project Name	Import Data Using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Technology Stack Details:

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	ServiceNow Web Interface	Provides the user interface for uploading spreadsheets, configuring imports, running transformations and viewing imported employee records.
2	Backend / Server-Side	ServiceNow Platform	Handles Import Sets, Transform Maps, field mapping, validation, business rules and data transformation on the server side.
3	Database / Data Storage	ServiceNow Database / Tables	Stores Import Set data and the final employee records. Custom Employee Test table is used to maintain transformed employee information.
4	Cloud / Hosting / Deployment	ServiceNow Cloud Platform	Provides the cloud-based environment where the application, tables, Import Sets and Transform Maps are configured and executed.
5	Version Control & CI/CD	GitHub	Can be used to maintain project documentation, configuration references and related project files with version history.
6	Third-Party APIs / Other Tools	Microsoft Excel / CSV	Provides the spreadsheet source containing Employee ID, Employee Name, Email, Department and Location data for importing into ServiceNow.
